

KELTY

SONORA II

SONORA II

The Kelty **Sonora II** — a front and top loading, large capacity backpack for long distance hiking and expedition type large load carrying. Easy access from the front and top make this a unique but practical pack.

With a total capacity of 4260 cubic inches (large size), the Sonora II represents the latest Kelty design in a functional and versatile backpack. The large double slider polyester zippered front opening allows easy accessibility to all areas of the roomy main compartment, while the top opening allows you access to the quickly needed items at the top of the pack.

Four outside pockets provide added area for accessories, food or clothing. We recommend the long side pocket (17"x6³/₄"x3³/₄" on the large size) for carrying tent and poles, bulky rain gear, or down clothing. The voluminous center pocket (11¹/₂"x11"x3¹/₂" on the large size) is an excellent compartment for quick access items — gloves, hats, sunglasses, etc. The smaller side pockets (8¹/₂"x6¹/₄"x3¹/₂" and 6³/₄"x6"x3¹/₂") will easily hold water containers and small pieces of equipment.

The Sonora II is fitted with a Massif frame and padded sectional suspension system which encircles the hips with firm, comfortable foam padding. The rear section is attached directly to the packframe with 5" wide tough nylon webbing and the front sections are angled to curve naturally around the hips.

Features of the Sonora II include four outside pockets, extra long accessory strap holders. Condura[®] nylon crampon patch, zippers of nickel or polyester (each used in appropriate applications), and ice axe loop.

SIZES AND WEIGHTS: Small, 4 lb., 8 oz.;

SONORA II PACK WITH THE MASSIF FRAME

FEATURES OF THE MASSIF PACKFRAME

TWO POSITION FRAME EXTENSION
Adjusts from 3" to 6". Provides lashing point for carrying high loads.

ALUMINUM ALLOY TUBING
Lightweight, strong and durable.

NYLON MESH UPPER BACKBAND
Cool, lightweight. Adjustable positioning and tension.

FIRMLY PADDED UPPER SHOULDER STRAPS
No-rot padding covered with seamless nylon. Won't shift or twist out of shape. Special reinforcement under grommet.

THREE POSITION SHOULDER STRAP ATTACHMENT
Adjustable for your shoulder width

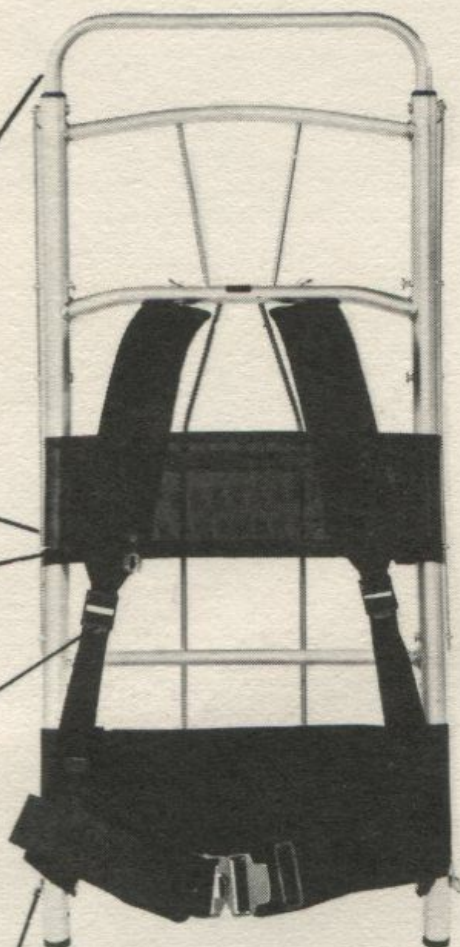

TABLER BUCKLE
For quick adjustment of shoulder strap length. Solid brass with black finish.

NYLON BACKBAND TIE CORDS
For fast, secure adjustment of backband tension. One-way grommet won't slip.

SUSPENSION SYSTEM
Hip encircling comfort with firmly padded backband attached to packframe with 5" nylon webbing. The integrally padded waist strap curves naturally across hips.

CAM-LOCK BUCKLE
Non-slip, easy to adjust and quickly released.

TWO POSITION WAIST STRAP ADJUSTMENT
Permits lowering the waist strap if needed for a finely tuned fit.

BODY CONTOURED FRAME
Follows your contours. Keeps the pack's center of gravity close to your back for stability and hiking comfort.

VERTICAL STAYS
For frame strength and packbag shape control.

TUNGSTEN INERT GAS (TIG) WELDS
Deep penetration welds at all critical joints provide strength and durability under the normal rough usage in backpacking.

FEATURES OF THE SONORA II PACKBAG

HOLD OPEN FRAME

Makes packing easy and maintains narrow profile necessary for proper pack balance. Since the hold open frame bears some weight we have specifically reinforced the packbag perimeter.

EXTRA WIDE TOP FLAP

Makes it easy to get to quickly needed items at top of pack and is wide enough to cover top of pack when fully loaded.

LARGE FRONT OPENING

A double slider polyester zipper allows easy access to all parts of the main compartment.

CENTER POCKET

Will hold many small items such as flash lights, hats, gloves, etc.

LONG SIDE POCKET

Recommended for carrying a tent and poles or long bulky items.

TWO SIDE POCKETS

For small gear and water containers.

COATED FABRIC

For extra rain protection.

CORD LOCKS

Hold flap down securely.

CRAMPON PATCH

11.5 oz. Cordura nylon for extra wear protection.

LARGE LEATHER ACCESSORY STRAP HOLDERS

Four slots provide lashing for foam pad, tent poles or crampons.

ICE AXE LOOP

Holds head of ice axe.

LEATHER ACCESSORY STRAP HOLDER

Ice axe snap strap fits through slots to hold ice axe shaft.

NYLON THREAD USED THROUGHOUT

**TO KEEP YOUR EQUIPMENT AS DRY AS POSSIBLE
WE RECOMMEND USING A RAIN COVER — EVEN
WITH A COATED FABRIC PACKBAG. NO PACK IS
WATERPROOF**
