Sierra Designs Starflight Two-man Backpacking Tent – Berkeley California

Posted on September 7, 2012 by Rob Drews

Berkeley era Sierra designs two-man two or three season asymmetrical tepee style tent. Features a two pole construction. Poles fit into grommets at the base of the tent then connect at the top through and elastic cord with the use of a heavy plastic pin joint. Two cords at the corners of the foot end of the tent running through grommets anchor that end up and out. The body has a half-moon zip fly screen door and Velcro closing outer door. There is also a small screen window on the top of the tent body about 3/4 of the way up from the foot to the peak. Tent rain fly stakes around from the base resting on the peak of the poles the fly door is Velcro closed as well.

Tent and fly are numbered 051302 and 050601 respectively.

Measures:

53" high at peak

97.5" long

58" wide

25" long by 5.5" wide when packed

Weights approx: 5 lbs

The three “snowy photos” are from

HikaNation in Illinois
Cave-in-Rock State Park
January 30, 1981 -- Day 294
